NSC Carrier Profile

The Carrier Profile is a measurement of a carrier’s on-road performance and is comprised of a carrier’s demographic information, accident records, contraventions, and vehicle inspections.

On-road performance is measured in the following ways:

- Contraventions: The number and types of violation tickets that have been deemed guilty;
• CVSA (Out of Service): Roadside CVSA vehicle inspections that put a power unit, trailer or driver out-of-service;
• Accidents: The number and types of accidents where the driver was found at fault or fault unknown;
• Total: Sum of accidents, out-of-service CVSA inspections and contraventions.

Profile scores are compared to the provincial median for carriers with the same or similar fleet size.

- Average Fleet Size: Calculated for a 12 month period by dividing the Total Active Vehicle Days by the Active Monthly Days.
o Total Active Vehicle Days: Calculated by adding the number of days each vehicle was operating under the NSC certificate for the previous 12 months.
o Active Monthly Days: Calculated by adding the number of days in each month that the carrier had an active vehicle.
• Risk Band: Carriers are divided into 7 risk bands based on their fleet size.
• Provincial Median: Calculated on an annual basis for each risk band and each category (Contraventions, CVSA, Accidents, Total).

Please report any items believed to be in error to the NSC Program Office by mail, fax, or email. The NSC program office will investigate and, where applicable, make the necessary corrections as promptly as possible.

NSC Interventions:

During the past [NN] months, the carrier has been subject to the following interventions:

Intervention Type Date

Triggered Interventions occur due to the carrier's profile scores exceeding the thresholds set by the NSC Program Office in any one of the four categories.

Section 2 - Profile Scores as of [Month Year]

Section 4 - Contraventions

This section lists all violation tickets issued to the carrier or to drivers operating vehicles under the carrier’s safety certificate during the requested time period.

NSC points are only assigned to violations where the carrier or driver has been deemed guilty. These points remain on the carrier’s profile for 12 months from the disposition date (when the carrier or driver was deemed guilty) and not the violation date (when the violation ticket was issued). Active points are only displayed for contraventions that impact the carrier’s profile scores. Further information regarding how points are assigned to each type of violation is available on the CVSE website.

The violation ticket details listed below are divided into the following sections:

- Section 4.1 - Driver Contraventions (Guilty)
- Section 4.2 - Carrier Contraventions (Guilty)
- Section 4.3 - Pending Driver Contraventions
- Section 4.4 - Pending Carrier Contraventions

Section 8 - CVIP Vehicle Inspection History

This section lists all commercial vehicle inspections (CVIP) conducted on and all Notice & Orders (N&O) issued to vehicles operating under this safety certificate during the requested time period. CVIP Inspections and Notice & Orders are listed for informational purposes only. NSC points are not assigned based on inspection results.

If vehicles are regularly failing CVIP Inspections, NSC recommends that the carrier review their vehicle maintenance and trip inspection programs to ensure that defects are being resolved in a timely manner and vehicles are being properly maintained throughout the year.
